4 December 2026

AI trip search for Squarespace

A Squarespace plugin that lets visitors search your existing trip catalogue in plain English ("a week of surfing in Portugal in May", "family trips under £2,000") and see the trips that match, on your own site, in your own style.

WHAT YOU GET

Catalogue indexing	Your existing trips, read from your Squarespace site, indexed so the search understands destinations, dates, activities, prices and descriptions.
AI search	Natural-language search over that catalogue, returning the best-matching trips with a short line on why each one fits.
Search interface	A simple search box and results list, embedded on the Squarespace pages you choose and styled to match your site, on phone and desktop.
Installation	Installed on your site through Squarespace code injection, tested on live pages.
Handover	A short written guide: how it works, how new trips get picked up, and how to switch it off.

NOT INCLUDED

- Monitoring, uptime alerts, error reporting or analytics dashboards
- Booking, payments, enquiry forms or changes to checkout
- Writing, editing or restructuring the trip catalogue itself
- Hosting and AI usage costs, which run on your own accounts

PRICE

ITEM	PRICE
AI trip search plugin for Squarespace Build, installation and handover, as above	£2,500
Bug fixes and extra development After handover, on request. Turnaround within one week of the request	£100 / hour

TOTAL £2,500

Fixed price for the build. Hourly work is billed only when you ask for it.

TERMS

- Prices are in GBP.
- The build is invoiced 50% on acceptance and 50% on handover; hourly work is invoiced monthly in arrears.
- Needs a Squarespace plan that allows code injection, and access to the site for installation.
- Hourly work is estimated before it starts and nothing is billed beyond the estimate without your agreement.
